SUMMARY

Software Development Engineer in Test (SDET). I build and maintain end-to-end test automation for native iOS and Android, and the continuous integration pipeline that runs it. Tools: WebdriverIO, TypeScript, Cucumber, Appium, GitLab CI, Xcode Cloud, BrowserStack, and Allure. I also do exploratory testing and manual testing on native builds when a release needs it.

EXPERIENCE

Software Development Engineer in Test (SDET)

Lottoland
Remote, Spain
2025 - Present

- Build and maintain end-to-end test automation for native iOS and Android with WebdriverIO, TypeScript, Cucumber, Appium, and the Page Object Model.
- Own the continuous integration pipeline: GitLab CI (lint, typecheck, dependency audit), Xcode Cloud builds, BrowserStack device runs, and Allure test reports.
- Debug failed and flaky automated tests on simulators and real devices using logs, Xcode, Proxyman, and Firebase configuration in Demo and Prod.
- Peer-review test automation code. Run exploratory testing and manual testing on native builds when a release needs it.
- Maintained a legacy Java, Appium, and Gradle test suite on this team, then moved that work onto the current TypeScript stack.

QA Automation Engineer

Lingokids
Remote, Spain
2020 - 2024

- Started as a manual QA engineer, then moved into test automation for iOS and Android, plus manual web testing, with bug reports and issue tracking.
- Wrote and maintained test plans and test cases for regression testing and end-to-end testing.
- Test automation with Appium, Cucumber, and WebdriverIO, including functional testing and localisation testing.
- Worked in Kanban, Agile, and Waterfall, using a shift-left approach.

QA Analyst

Freelance
Montevideo, Uruguay and Madrid, Spain
2018 - 2020

- Test plans for alpha and beta builds, functional testing, localisation testing, and regression testing.
- Release notes and translation of in-game text.

SKILLS

Test automation, end-to-end testing, exploratory testing, manual testing, regression testing, Page Object Model, BDD, continuous integration, CI/CD.
WebdriverIO, TypeScript, JavaScript, Cucumber, Appium, Java, Gradle, Git, GitHub, GitLab, GitLab CI, Xcode, Xcode Cloud, Android Studio, BrowserStack, Allure, Testomat.io, Firebase, Proxyman, HTML, CSS, React, Vue, Lua.
Unity, Godot, Playdate SDK.

EDUCATION

Industrial Electromechanics, UTU Arroyo Seco, Uruguay. 2015.
